## Product Developer

Do you want to be a part of a great, dedicated team with a passion for probiotics and product development?

The probiotic health segment is growing and new research is improving our knowledge every year. Working with products that improve people's health and well-being is a truly rewarding experience!

Probi is now expanding the Product Development and Application team in Lund, with a Product Developer.

In this role as Product Developer, you will work with projects and tasks within the field of probiotic applications, both in the Consumer Health Care and Functional Food area. The work will mainly be performed in a project-based way. The projects / working tasks can be run from different parts of the organization, for example from R&D, Operations, Application and Marketing & Sales. You will have contacts both internally and externally, for example with suppliers and customers. Your daily work will include both theoretical and laborative working tasks.

The work will be performed with the application know-how and probiotic formulations in focus.

### Responsibilities

- Responsible for the application part in various types of projects and working tasks.
- Plan, perform, evaluate and document various lab scale trials within the application area.
- Work with technical documentation, for example specifications for products and ingredients.

### Background

- You hold a MSc degree in Food technology, Biotechnology, Pharmaceutical Science or similar education.
- You have about 3-5 years of product development experience within the food industry or similar.
- Experience of microbiology and/or probiotics.
- Experience in project management.
- Excellent communication skills in English, spoken as well as written

### Personal

- Structured, analytical and problem-solving
- Prestigeless and with excellent team working skills
- Independent with a strong personal drive

- Curious and possess the flexibility to meet various demands and priorities
- Service oriented towards internal and external customers/suppliers.
- Innovative and with a strong passion for healthy food and consumer health care products
